

Laftan Innovative Solutions In Medical Devices

Company Profile

LAFTAN is proudly the most sought after name in the field of Medical Diagnostic Instruments. Since its birth, the chief aim of our company has been to utilize all its energies, manpower and technology towards developing superior quality instruments, with special emphasis on them being technically precise as well as user friendly. In order to serve the interest and meet the requirement of our customers, we endeavor to the best of our abilities to improve our existing line and also introduce new products.

LAFTAN is located in mane city of Sialkot, which has been a major manufacturing center for Surgical and Medical Instruments since the independence Pakistan. We specialize in the production of anesthesia products, Laryngoscopes and Diagnostic instruments. From our base in Pakistan, We are serving people in the Medical profession in virtually every country through our well established dealers network. We are also supplying products to various original Equipment Manufacturers (OEM) in strategic parts of the globe, Who are covering a vast territory through their sales network. LAFTAN has grown from a small-scale company since its establishment in 1997 to a large scale Company. This has been achieved due to the presence of a skilled and motivated group of people who, through their utmost dedication, have helped produce premium quality products. The Company has complete in-house manufacturing facility and Our product range includes.

- Laryngoscopes
- Otoscope
- Dermatoscope
- ENT Diagnostic Sets
- Emergency Filed Kits
- Fiber Optic Equipment.
- Diagnostic Instruments and Apparatus.
- Medical Hummer
- Tuning Fork

We understand the importance of quality in the manufacturing process. That is why we maintain a total quality improvement process in manufacturing throughout our company. Our manufacturing facilities are equipped with the most modern machinery to attain the highest our perfection of quality. A number of innovative processes are incorporated to control production of critical components that can often make the difference between a good product and a great one. Processes in the manufacturing and throughout the company are continually reviewed through our total quality management process, not only to maximize productivity, but also to guarantee that products and services meet the highest standards. As a result, both companies have attained ISO 9001: 13485: 7376 Certification, are cGMP complaint firm and have the CE mark and FDA U.S confirming the quality standard of our products.

(LAFTAN is work for your Health)

Thanks you for selecting our company products.

cGMP CE ISO 9001: 2008 – ISO 13485: 2003

LAFTAN FlexTip + Fiber Optic (FO) Laryngoscope Blade

Laftan Innovative Solutions In Medical Devices

LED BULB

Available Blades With Conventional & Mega FO. Style

Code LTI-7000

The Flex tip is a Macintosh laryngoscope blade with a tip which is adjustable through 70%. A lever controls the tip angle during incubation to lift the epiglottis, giving a clear view of the vocal cords. Contact with upper row of teeth and unnecessary pressure on the tongue and soft tissue are avoided.

LAFTAN HI-LIGHT fiber optic bundle: 4mm dia
 LAFTAN Xenon Halogen Technology: For up to 40% more light than conventional halogen bulb
 LAFTAN LED Bulb: Hi light LED bulb with white light life 5 year don't need for replace

- Swivelling blade tip facilitates difficult incubation.
- Reduced likelihood of damage to teeth and soft tissue.
- Integrated Fiber Optics for the best possible illumination.
- High quality stainless steel construction.
- Autoclavable.
- Fits all standard FO. handles (green standard)

Require: 2 x C size batteries
 Supply set with hard case or packing.

| Available Blades Size | Code |

Innovative Fiber Optic Technology for advanced performance

- : LAFTAN Hi-light Fiber Optic bundle with 4.3mm dia. And up to 6500 individual micro-fiber for improved light transmission and longer life.
- : LAFTAN LED Technology: For up to 40% more light than conventional halgen bulb
- : Smooth shape avoids sharp edges and cavities for easy cleaning and sterilizing.
- : These blades need no maintenance - ever
- : Both ends of the fiber bundle are protected - for life
- : 2.5V battery power for even more light.
- : Compatible with all handles to the ISO 7376 (green Standard)
- : Autoclavable.
- : Fits all standard FO. handles (green standard)

Require: 2 x C size batteries
Supply set with hard case packing.

LAFTAN FixTube + Fiber Optic (FO) Miller Laryngoscope Blade

Laftan Innovative Solutions In Medical Devices

LED BULB

Code LTI-7002

The Miller FixTube Fiber Optic (FO) Laryngoscope blades with improved geometry simplify incubation. The shortened shoulder of the blade dramatically improves the anesthetist's view of the epiglottis and vocal cords. The distal lip of the blade features a special atraumatic shape

LAFTAN HI-LIGHT fiber optic bundle: 4mm dia
 LAFTAN LED Technology: For up to 40% more light than conventional halogen bulb

LAFTAN Macintosh Disposable Laryngoscope Blade

Laftan Innovative Solutions In Medical Devices

LED BULB

Code LTI-6001

These disposable stainless steel laryngoscope blades are manufactured for maximum strength and durability. The blades consist of a stainless steel blade and flange with an inter molded durable plastic locking mechanism. The light source utilizes a crystal-clear plastic tubular fiber optic bundle style designed to reflect bright white light from the handle to the distal tip of the blade. Compatible with all Green light Fiber Optic systems. Now you can have the durability and strength of a regular stainless steel reusable laryngoscope blade

Compatible with all handles to the ISO 7376 (green Standard)
 Require: 2 x C size batteries
 Supply set with hard case packing.

LAFTAN Fiber Optic (FO) Otoscope

Laftan Innovative Solutions In Medical Devices

Code LTI-3000

Fiber optic Pocket Otoscope boasts incredible optics in a compact form.

- Fiber optics for cool, obstruction-free light transmission
- Choose from 2.5v Xenon or LTI-786-001-01 LED lamp for true tissue color
- Wide angle swivel 2.5x viewing lens permits instrumentation
- Insufflator port (fitting and insufflator sold separately) for pneumatic otoscopy
- "AA" battery handle (batteries included) with on/off power switch integrated into pocket clip
- Includes tube with 5 each Welch Allyn 2.75mm and 4.25mm specula
- Choice of fitted hard case or nylon pouch with belt loop
- Otoscope in hard case measures 185mm x 105mm x 35mm
- Otoscope in soft case measures 225mm x 110mm x 30mm

LAFTAN mini Dermatoscope, A Deratoscope in a handy pocket format Modern pocket dermatoscope in a compact design with high-quality optics. 10X magnification large, high-resolution image. Choice of two skin-friendly and sterilizable contact plates: with scale from 0 - 10mm for exact measurement of pigmented skin lesions, without scale. Simple lamp change on the underside of the instruments head. Enhanced LED Technology for more light bulb life 5 years very bright white light Attachment clip with integrated On/Off switch. Switches off automatically when returned to the pocket. High-quality 2 color handle: upper section white and down section black

Supply: Supply with soft pouch

Require: 2x AA batteries (not included with set)

Code LTI-201

A Dearmatoscope in a handy pocket size Technically -similar to the LTI-200 Dermatoscope with mini plastic handle connector.

Require: 2x AA size batteries.

Supplies: Soft Black pouch packing with extra 0 - 10 scale glass plate.

Code LTI-200

High-quality instrument in compact for this 10x magnification. Adjustable focus. Bayonet connector, Available with 2.5 regular and LED Halogen Technology lamp for super bright illumination.

Require: 2x C size batteries.
Supplies: Soft Black pouch packing with extra 0 - 10 scale glass plate.

Available: Polish and Sand finish

Code LTI-202

Illumination of the examination field with 2.5v XL Halogen illumination or 2.5V regular German and LED bulb illumination resembles natural daylight. 10-fold magnification of the skin structure with focusing achromatic lens. Choice of two skin-friendly and sterilizable contact plates: with scale from 0-10mm for exact measurement of pigmented skin lesions, without scale. Simple lamp change on the underside of the instruments head.

Require: 2x C size batteries.
Supplies: Soft Black pouch or hard case packing

Available: Polish and Sand finish

LAFTAN Tip Therm

Laftan Innovative Solutions In Medical Devices

BLACK

ORANGE

GRAY

Code LTI-204

LAFTAN TIP THERM
Is an early diagnostic device for symmetrical polyneuropathy which measures temperature Sensitivity of the skin. LAFTAN Tip Therm was developed to give clinician and patient a convenient and easy to use method of testing. It works up to temperature of 23° C/ 73,4° F. LAFTAN TIP THERM is made of special polymer and metal alloys. The polymer side feels warmer and the metal alloy side cooler due to the thermal conductivity property of the material.
